SUMMARY

Computer Science undergraduate (AI & ML) with a strong foundation in Java, Object-Oriented Programming, and Data Structures & Algorithms, backed by hands-on backend engineering experience with Spring Boot and REST API design. Qualified for Smart India Hackathon (SIH) 2025, with a consistent track record of shipping complete projects end to end under time constraints. Eager to apply strong problem-solving and coding fundamentals to build scalable, production-grade systems as a Software Development Engineer.

TECHNICAL SKILLS

Programming Languages: Java (Object-Oriented Programming, Data Structures & Algorithms), JavaScript

Databases: SQL, MySQL

Frontend: HTML, CSS, JavaScript, React.js

Tools & Version Control: Git, GitHub

Cloud: familiar with Google Cloud fundamentals

INTERNSHIPS

Java Developer Intern — Infosys Springboard 6.0

Oct 2025 – Jan 2026

- Worked as a Java Developer Intern, contributing to backend development on the Farmxchain platform under mentor guidance.
- Built and tested REST APIs in Java and Spring Boot, including JWT-based authentication and a unique user-ID system for inapp communication.
- Strengthened core Java, OOP, and Data Structures & Algorithms fundamentals through structured coursework and hands-on coding tasks.

Intern — Google Cloud Generative AI — SmartBridge

May 2026 – Present

- Interning with SmartBridge on a Google Cloud Generative AI track, gaining exposure to cloud-based AI tools and workflows.
- Applying AI & ML coursework alongside core engineering skills to build a well-rounded, full-stack-plus-AI technical foundation.

PROJECTS

Farmxchain — Agriculture-based AI-driven Platform

Nov 2025 – Feb 2026

Technologies: Java, Spring Boot, JWT, HTML, CSS, JavaScript

- Designed and implemented backend REST APIs in Spring Boot with JWT-based authentication and a unique user-ID system for secure in-app communication.
- Built the core data flow enabling farmers to sell products directly to customers or distributors in real time. • Integrated an AI-based module to evaluate leaf/product quality and recommend appropriate pesticides.

Library Management System

Mar 2026 – Apr 2026

Technologies: React.js, javascript, sql,

- Modeled relational schemas in MySQL and implemented business logic for due-date tracking and automatic fine calculation.
- Exposed clean REST endpoints for all core operations, tested with Postman for correctness and edge cases.
- Built an system that can help to student and the librarian to find out the books easily

AI-Powered Resume Screener [\[Project link\]](#)

Jan 2026 – Feb 2026

Technologies: Java, Spring Boot, Python (ML microservice), REST APIs

- Built a Spring Boot backend that accepts resume uploads and job descriptions, orchestrating calls to a Python ML microservice for candidate-role matching.
- Applied OOP principles to keep the scoring engine, storage layer, and API layer cleanly decoupled and testable.

Vocation Booking Platform [\[Project link\]](#) *May 2025 – Jul 2025*

Technologies: HTML, CSS, JavaScript, Java (backend logic)

- Designed and built a booking system for tourism accommodations, covering property search, availability checks, and reservation confirmation.
- Implemented backend logic to validate bookings and prevent date-range conflicts, ensuring reliable reservation handling.

CERTIFICATIONS

- Java Internship Completion Certificate — Infosys Springboard
- Database Management System — Infosys Springboard
- Joy of computing using Python- NPTEL
- Cloud Computing – NPTEL

ACHIEVEMENTS

- Qualified for Smart India Hackathon (SIH) 2025 — a national-level problem-solving and product-building competition.
- Team member, Technical Coordination Cell (TCC), SVCE.
- Participated in multiple hackathons, building working prototypes under time constraints.

EDUCATION

B.Tech in Computer Science (AI & ML) — Sri Venkateswara College of Engineering *Jun 2023 – May 2027 CGPA: 9.0*

Intermediate (MPC) — Sreenivasa Junior College *Jun 2021 – May 2023*

Score: 987/1000

SSC — Government High School *Jun 2016 – May 2021*

Score: 550/600
